Work in Process

Tried sketching the shape of a jellyfish. A rough outline of a jellyfish.

Sketch combines dessert elements: cream, cherry, and a vintage plate. It also tries to include the brand's core concept, “Written on water.”

Simplified the sketch into a clean symbol, focusing on recognizability.

Added the lunar phases and redesigned the tentacles as dots and water drops, emphasizing core concept of water.

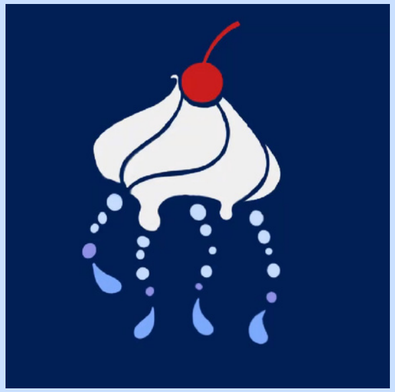

Refine the cream and the cherry atop the jellyfish. Notice the similarity between the shape of the cream and the umbrella-like body of a jellyfish.

Work in Process

Start using the shape of cream as the jellyfish's body to highlight the dessert shop's brand identity.

Experiment with adding color elements, blending cute and dreamy colors to test different vibes.

Replace with a deep blue color scheme. This enhances contrast and a simplistic aesthetic.

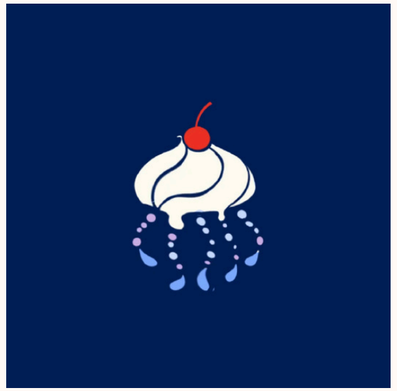

Incorporate the moon component to echo the brand name Moon Jelly.

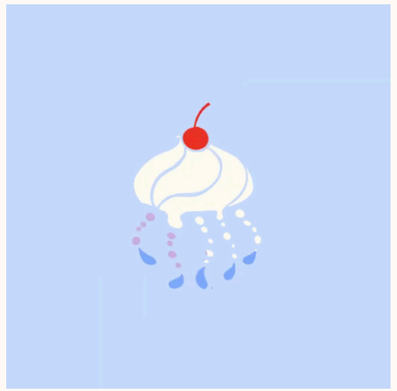

The jellyfish's bell (the cream's shape) should be rounder to more closely resemble a real moon jellyfish.

Work in Process

The moon element has been removed. The overall shape already more closely represents a real moon jellyfish. Different color schemes were then re-explored.

Tried pairing light backgrounds with light-colored subjects to create a dreamlike effect. But found that legibility decreased.

Adding the element of a classic plate to the background, with a rough outline. It echoes the brand's timeless elegance.

Complete the design of the plate shape to make the logo more cohesive and structured.

4th color scheme attempt: comparing the multicolor and dual-color schemes to evaluate their alignment with the brand's image.

Work in Process

The logo design has been simplified and refined. The cherry is again red to test how color highlights affect the overall visual impact.

After comparing different color schemes, it was found that the blue and white scheme better aligns with the brand's overall tone.

Finalize the icon's design, adjust the proportions and colors to align with the brand's primary color scheme.
